

ALTHEA NETWORK
“TECHNOLOGY THAT POWERS THE IMPOSSIBLE TO POSSIBLE!”

Reaching out beyond their own network - Althea’s technology makes a BIG difference in small town Enfield, North Carolina.

With support and technology from Althea Network, Wave 7 Communications, LLC secured a 2021 Truist EPIC Grant. With the Grant Wave 7 Internet powered by Althea’s technology was able to provide 25 families with internet service for 1 year, and a Chromebook to help their school-age children have access to online education.

The Grant also allowed for the Community of Hope Center, a non-profit organization, to provide a 4-week Digital Literacy Class for Senior Citizens that focused on computer basics and ways to connect with their families and friends online during this pandemic!

“Grants are so necessary and just as hard to come by...” says Althea CEO, Deborah Sempier, “it’s satisfying to make a difference - securing the Truist EPIC Grant and powering Wave 7 internet, changed lives.”

About Althea (althea-enfield.net)

Althea is a new way to access broadband internet that enables growth in the network through a unique system of revenue sharing. Althea was founded in 2017 with the vision to bring the open market and interoperable peering from the data center to the field and empowering communities to build multi-stakeholder networks faster and more affordably than legacy telecom models.
